Seattle, WA (Open to Relocation) | +1 206 714 0177 | likhitakrovidi@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

PMP-certified Product Manager with 3+ years shipping enterprise SaaS products, including an LLM-powered service-management assistant scaled to 100K+ users. Pairs a software engineer's technical depth with end-to-end roadmap ownership in cross-functional teams.

EDUCATION

Northeastern University

Master of Science in Project Management, Agile Concentration

Coursework: Business Analytics, Risk Management, Leading and Managing Technical Projects, Scope Management.

Sept 2025 - Expected Dec 2026

Seattle, WA

Osmania University

Bachelor of Engineering in Computer Science Engineering

Aug 2018 - Jun 2022

Hyderabad, India

CERTIFICATIONS

- [Project Management Professional \(PMP\)](#) - Project Management Institute (PMI)

EXPERIENCE

Product Manager

Dec 2022 - Jan 2025

OpenText

- Launched [Service Management Aviator](#), a generative-AI virtual agent, to 100K+ enterprise users, owning its end-to-end integration, LLM data pipeline, and evaluation protocols.
- Owned the roadmap for [Life Sciences](#) and [Healthcare](#) products through shifting regulatory requirements, reprioritizing investments to keep every release at 100% audit compliance.
- Shipped automated risk-scoring and sentiment-driven escalation that sped up incident resolution by 38% and cut manual triage for support teams handling enterprise-scale volume.
- Reprioritized the security roadmap via competitive and threat-landscape analysis, resolving critical risks flagged in production before they reached customers.
- Partnered with Engineering and R&D to automate document intake and sorting, improving operational efficiency by 20%.

Software Engineer

Nov 2021 - Dec 2022

OpenText

- Built a document-retrieval evaluation platform on Docker, Kubernetes, and REST APIs, then tuned its container orchestration to cut cloud costs 15% and improve observability.
- Tracked down data-ingestion pain points through functionality and usability testing across SaaS platforms, working with product teams on fixes that improved performance and reliability 35%.

PROJECTS

[Authentic Exploration Matters \(AEM\): NASA Funding Case & Launch Plan](#) (Nonprofit Client, Graduate Capstone)

Sept 2026 - Ongoing

- Advising a nonprofit client on the business case and pilot plan for AEM's funding pitch to NASA Kennedy Space Center's workforce development arm, anchored in its 100% teacher-retention record and a pricing scan of competing programs.
- Designing AEM's teacher mentor-mentee program, including pairing criteria across school types and teacher segments, to reduce the mismatches that drive turnover; translating it into a Jira backlog of user stories and acceptance criteria.

[AdaptX: Surgeon & Drug-Regimen Outcomes Platform](#) (Healthtech Client, Experience Expo)

Sept 2026 - Ongoing

- Lead a 6-person team as product manager, owning the project charter and scope baseline; defined four stage-gated milestones (patient grouping, clustering, plasma modeling, outcome linkage) with client-agreed acceptance criteria; primary contact for AdaptX.
- Designed the analysis plan for up to 8 drugs across dose and timing ranges, using clustering and propensity score matching to separate drug effects from patient risk and identify practice patterns that improve patient recovery.

CAMPUS ROLES & LEADERSHIP

Enrollment Manager, Northeastern University

May 2026 - Ongoing

- Support onboarding for 30-40 incoming students weekly, resolving ID and system-access issues as liaison to professors and advisors.

Co-Founder / Marketing Officer, Graduate Resiliency Group, Northeastern University

Sept 2025 - Ongoing

- Co-founded a 20+ member graduate organization; as Marketing Officer, promoted its mental-health and wellness programming, which reached 85% participant satisfaction.

SKILLS

Product Management: Product Strategy & Roadmap (RICE), PRDs, OKRs, KPIs, User Research, Market & Competitive Analysis, Success Metrics.

Agile & Collaboration: Agile/Scrum, Sprint Planning, Stakeholder Management, Cross-Functional Leadership, SDLC

AI/ML & Compliance: Generative AI, RAG, LLM Evaluation Datasets, Model Lifecycle, Responsible AI, RBAC, Data Isolation

Technical & Analytics: Python, Java, SQL, PostgreSQL, API Development, AWS, Docker, Kubernetes, RabbitMQ, Tableau, Data Modeling

Libraries & Tools: Pandas, TensorFlow, NumPy, Scikit-Learn, Flask, Jira, Confluence, GitLab, MS Project
